

Call for New Group Leaders

Centre Jean Bernard, St-Louis Research Institute

U944-UMR7212

The Centre Jean Bernard-INSERM U944-CNRS UMR7212-Paris Diderot University, University of Paris (<http://www.jeanbernard.univ-paris-diderot.fr/fr/>) is located into a 2000 m² renovated building on the site of Saint Louis Hospital (central Paris). Our research encompasses a broad spectrum of fields, including basic virology, yeast biology, cell and chromosome biology, cancer genomics and biology including leukemia research, and functional studies of post-translational modifications. Most studies carried out in the unit bridge several of those fields and have implications in translational research, together with clinical groups. The unit benefits from a direct access to the core facilities of Saint Louis Research Center (IRSL, previously IUH, included in the University of Paris), including a recently extended animal house and a technological platform.

We are looking for junior or senior investigators broadly interested in any topic developed in our center. Appropriate laboratory space for up to 6-10 persons will be available for applicants. Extra support packages may be obtained by the Saint-Louis IHU THEMA project or the IDEX University programs. Candidates should meet criteria to obtain national (such as Atip-Avenir, FRM *Amorçage* or other equivalent grants) or international funding (ERC) and for French institutional research positions (CNRS or Inserm).

Applications (in English) should be sent before **July 15th, 2019** to jean.soulier@aphp.fr and secretariat.u944@inserm.fr, as a single <5M pdf file '*applicantName_application2019.pdf*':

- 1 page personal statement explaining why you are interested in joining our entity,
- Up to 4 pages research proposal summarizing past achievements and plans for the next 5 years,
- Full CV (academic track, publications, patents, awards and fellowships, invited conferences, teaching/training experience and any relevant information),
- Contact details of 3 referees who can be contacted for recommendation letters.

Short-listed candidates will be invited for interviews after the summer by the international scientific advisory board (SAB).

Any question regarding the call can be sent to jean.soulier@aphp.fr and secretariat.u944@inserm.fr
